

**Year 4 Foundation
Overview
1st- 5th June**

Science

The Water Cycle
This week we are finishing off our topic by looking at The Water Cycle. After working through the power point and watching the video, complete the water wheel activity. There is a one, two and three star option so choose the star you would normally tackle in school

Computing

Working at home, everyone is using the internet a lot more, but it is important for us all to stay SAFE online.

At school, we learned about being SMART online. Can you remember what each letter stands for?

Watch the video for 'the S rule' and complete the activities. It would be good to watch with an adult so you can discuss your ideas. Choose one of the challenges at the end of the video to complete.

<https://www.childnet.com/resources/video-lessons/the-s-rule>

PSHE

Try to find a flower rainbow on a woodland walk– see attached sheet.

Super star challenge

Write the silliest sentence you can using the words:

banana, dolphin, curtain, snow and balloon.

Extra challenge: can you write a silly story using all these items?

Project – Rivers

This term our new topic is 'Rivers'.

This week we will learn how a river begins, where it finishes and some key vocabulary about rivers.

You are going to create a river glossary and you need to pick the star level you would normally complete in class.

A glossary is an alphabetical list of terms of words around a topic that are difficult to understand. I have started the glossary terms for you to complete. Can you spot my marvellous mistake? How would you correct it?

Creative Challenge!

Recycling Art

Create an animal using recycled materials. E.g. you could create a plastic jellyfish, or an elephant milk carton!
