

**Year 4 Foundation
Overview
22nd - 26th June**

Science

Invertebrate Hunt
This week we're going to focus on invertebrates (animals with no backbone). You're going to find invertebrates in your garden, a local park or woodland area. Your job will be identifying them and correctly classifying the invertebrates. Have lots of fun on your invertebrate hunt!

Computing

Working at home, everyone is using the internet a lot more, but it is important for us all to stay SAFE online.

Go on the website below and play 'Reality River'. Can you make the right decisions to stay safe online and make it across the river?

https://beinternetawesome.withgoogle.com/en_uk/interland

Feel free to have a look at the other games too!

PSHE

This week's theme is Be Kind. We are all important and unique. Fill in Amazing Person sheet all about **you**.

**Super star
challenge**

Choose an activity from the STEM challenge cards.

Project – Rivers

Last week you chose a river to research.

This week you need to decide which information you found out that you'd like to include. Then you need to decide how you'd like to present your research and start on your project. It should take two weeks to complete the project. See last week's video (link below) for presentation ideas. The research sheet from last week is included with this week's work in case you need to catch up.

Creative Challenge!

Create your own handprint doodle art using this video.

<https://www.thecrafttrain.com/handprint-doodle-art/>

Perhaps you could get creative and use your own shape e.g. a heart, a leaf, a flower.
