

**Use this sheet to help you answer questions for later use on the research project.**

What is the name of your river and where is it located? What countries and/ or cities does it flow through?
What is the length the river?
How does the climate vary along the length of your river (if it varies)? Why do you think it varies?
What industries are found along your river? Why would they be built there? What is the water used for in mostly?
Where does your river start and where is the mouth (where it finishes) of your river?
How do people use the river for transporting goods? What sort of goods are transported? If the river is not used for transport of goods, then why do you think this is?
Is the river used for leisure (canoeing, cruise ships, barges, fishing, swimming etc.)?
What happens to the river after a big rain? If it floods, why does it flood? If not, why not?

What species of wildlife live in or near your river?

Can you see any oxbow lakes (on Google Earth) near your river?

Are there any waterfalls in your river?

Any other information:
