

Dear 4T,

Welcome to 5B. You're about to have the most exciting year of your life! I am really looking forward to teaching you and learning more about you. It is my third time in year 5, so we can keep growing and learning together.

My favourite subject is Maths and I also love bringing lots of drama into the classroom. I also love reading and history. **What's your favourite subject? Which topic have you enjoyed the most this year?**

During the summer, I was supposed to going on holiday to France with my wife's family. She has two sisters and they both have children, but I'm an only child. **Do you have any brothers or sisters? Are you going on any holidays?** I have been on lots of lovely holidays but my most exciting were to America. We went the a huge amount when I was a child, as my dad really liked it. This means I have seen most of the country. **Have you ever been on any exciting holidays?** Instead of going away this year, I'm having a new baby.

When we are not at school I love spending time with my family. On weekends I watch a lot of sport and love to walk in the countryside. **What are your hobbies?**

Whilst I love being a teacher, when I was your age I wanted to be a fighter pilot, because my father was in the air force and I grew up around planes. After spending some time with the RAF though, I soon realised this wasn't the life for me. Instead I became a teacher, which I absolutely love! **What do you want to be when you grow up?**

I am looking forward to meeting you!
Mr Birmingham
