

Presentation Top Tips

When you're presenting your work use these tips to help you:

- 1) Explain what your presentation will be about.
- 2) Speak loudly and clearly. Don't rush your words to get it over with. A steady pace will make you sound more confident.
- 3) Aim for your voice to bounce off the back wall of the room but without shouting the words.
- 4) Sound passionate about your project as this will make your audience more interested.
- 5) Memorise your last sentence so that you can maintain eye contact with your audience and finish confidently.
- 6) Remember it doesn't matter whether you are really confident or not; you just have to pretend to be!
- 7) Have fun! If you're happy to be videoed, we'd love to see the videos of you presenting your work.
