Spring term

**Shottermill**  
**Junior School**

We have loads of amazing exciting extra curricular activities and to start we are going to learn about ECO GARDENING. Students that chose eco gardening chose it because they wanted to help the environment and wild life. They have recently been litter picking and gardening. Some kids say that eco gardening is fantastic and want to encourage lots of children to choose this eca. They really enjoy being outdoors in the wild life. They all want to be eco friendly and want to encourage everybody to be. We want everyone to take their part in helping are world and environment. They have also been sweeping leaves and have been doing all they can to help are world.

*As well as eco gardening we have multi sports. It is a range of fun and exciting activities. For example some of the activities are basketball and hula hooping. Multi sports is good for you because you are outside and are in the fresh air. Multi sports is exercise, every one that i have seen is having tons of fun all enjoying there eca .*

So how do you like these ecas.  
What was your favourite?
