

# Shottermill ECA report

## Spring addition

### Arts and Crafts.

We visited the arts and crafts ECA and interviewed some people, this is the information we managed to get. It is an amazing ECA and quite easy; The hardest part was making straight lines on different and round objects, such as a used toilet roll. Some of the things they have done include pot making and designing toilet rolls. All the people we interviewed have said they liked this ECA and would recommend it to anyone creative that loves art work. Reid Hinds from 6H would say that this is the best ECA that he has done so far at shottermill junior school.

### Physical Activities

This ECA is amazing because you do a lot of sports and it teaches teamwork; the best part so far is basketball and they've done sports and teamwork exercises. The trickiest part is when someone doesn't want to work with you. George C from 6W would 100% recommend this ECA.

## Debate

In this ECA they have been arguing as to whether kids should be allowed to choose there lessons in school and coming up with reasons for both sides of the argument. According to Dyako in 6W, you should be able to and the ECA is very good.

## Summary

All in all, any ECA you pick will be good, just make sure you pick one that you think you would like the most. They will have a description on the form you fill in to choose the ECA you would like to do.
